

Fighting disease

I. How did each of these people help in the fight against disease? For each pair say which is more important and why

a)

b)

c)

2. Explain how the following factors helped develop germ theory

Factor	How did it help?
Government	
Chance	
Science and technology	
Individual Genius	

3. Explain how the following factors helped develop Penicillin

Factor	How did it help?
Government	
Chance	
Science and technology	
Individual Genius	
War	

4. Spot the mistakes in this concluding statement

Penicillin was discovered by Florey by accident when he left a petre dish in his laboratory and went on holiday. However, it was Fleming and Chain who worked out how to mass produce the mold. Overall, I think Fleming is more important as without him they would not know Penicillin for Florey and Chain to develop.
